Conceived, realized, consolidated, the user experience UX / UI web based and native app interfaces by simplifying and decongesting the expected end user layout and interactions, setting all functional user interactions on the client side as defined by my new user interaction specs.

( For Full work history see portfolio link below )

### EDUCATION

**Sandford High, ME . Diploma**

### PROJECTS

#### Portfolio / Full Work History

<http://www.brianux.com>

( 3+ ) . inVision ( 4+ ) . Any company adopted prototyping and product management tools . JIRA ( primary task tool ).

### VALUED RESULTS

High conversions, adoption, retention and frequency of use . that's the goal. 95% of app companies fail at this.

It all stems from software value and end user workflow success.

If your conversions and product retention rates are not 99.5% or higher then there's room to get better.

SaaS and DaaS is huge, the competition is astounding, you do not have a monopoly on ANY data ( API ) anymore, because its all for sale.

### FUN

Forecasting and predicting valuable and successful real world subscription based SaaS mobile app concepts and ideas.

BBQ . Family .

### LANGUAGES

English

**Albert Einstein** is broadly credited with astutely exclaiming

“The definition of insanity is doing the same thing over and over again, but expecting different results”.

- We've only Just begun -
